Explain Why

TEAM

OlsOls Agents

Why questions get fluent answers that nobody can check.

LLMs explain fluently but unverifiably.
Dashboards show what changed but not why.
Doing it properly takes hours.

ASK Why did Intel's gross margin fall in 2024?

GET 40.0% to 32.7%: one-off charges and depreciation lead, lower revenue third

TAP Taps F15 to see the SEC row and SQL, then rewrites her sentence

BECAUSE

- **Restructuring and impairment charges increased**. Accounts for up to -6.1 pts of the -7.4 pts move. It rose $7.03B while total cost of sales rose only $3.24B, so at most -6.1 pts can sit in cost of sales; the rest is in operating expenses (XBRL does not say where). One-off: Restructuring and impairment charges of $6.97B in FY2024 were over 2.5x the prior-years average ($855.3M): a large single-year charge, likely one-off. F15 F13 F14 F4

F15 · derived

Restructuring and impairment charges was 13.1% of revenue in FY2024 vs -0.1% in FY2023 (+13.2 pts; -$62.0M -> $6.97B) - but cost of sales rose only $3.24B

Calculated from the query results in this run (no extra query).

In evidence table

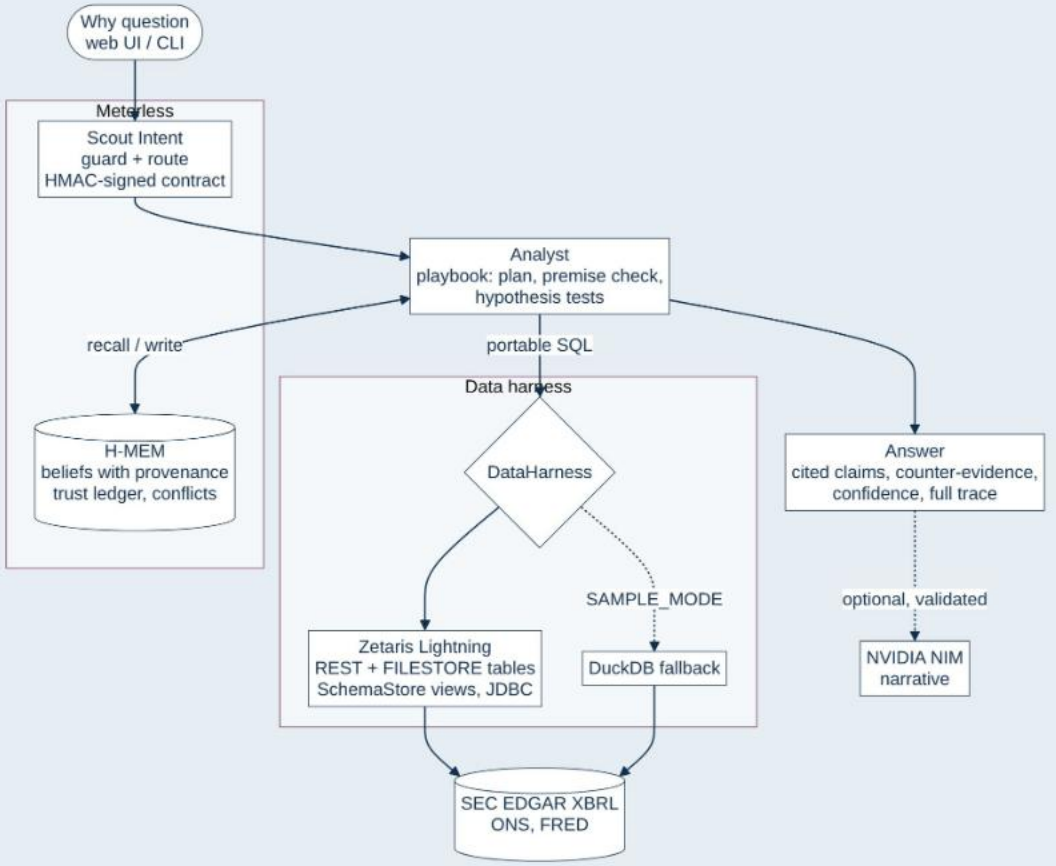

COUNTER-EVIDENCE AND LIMITS

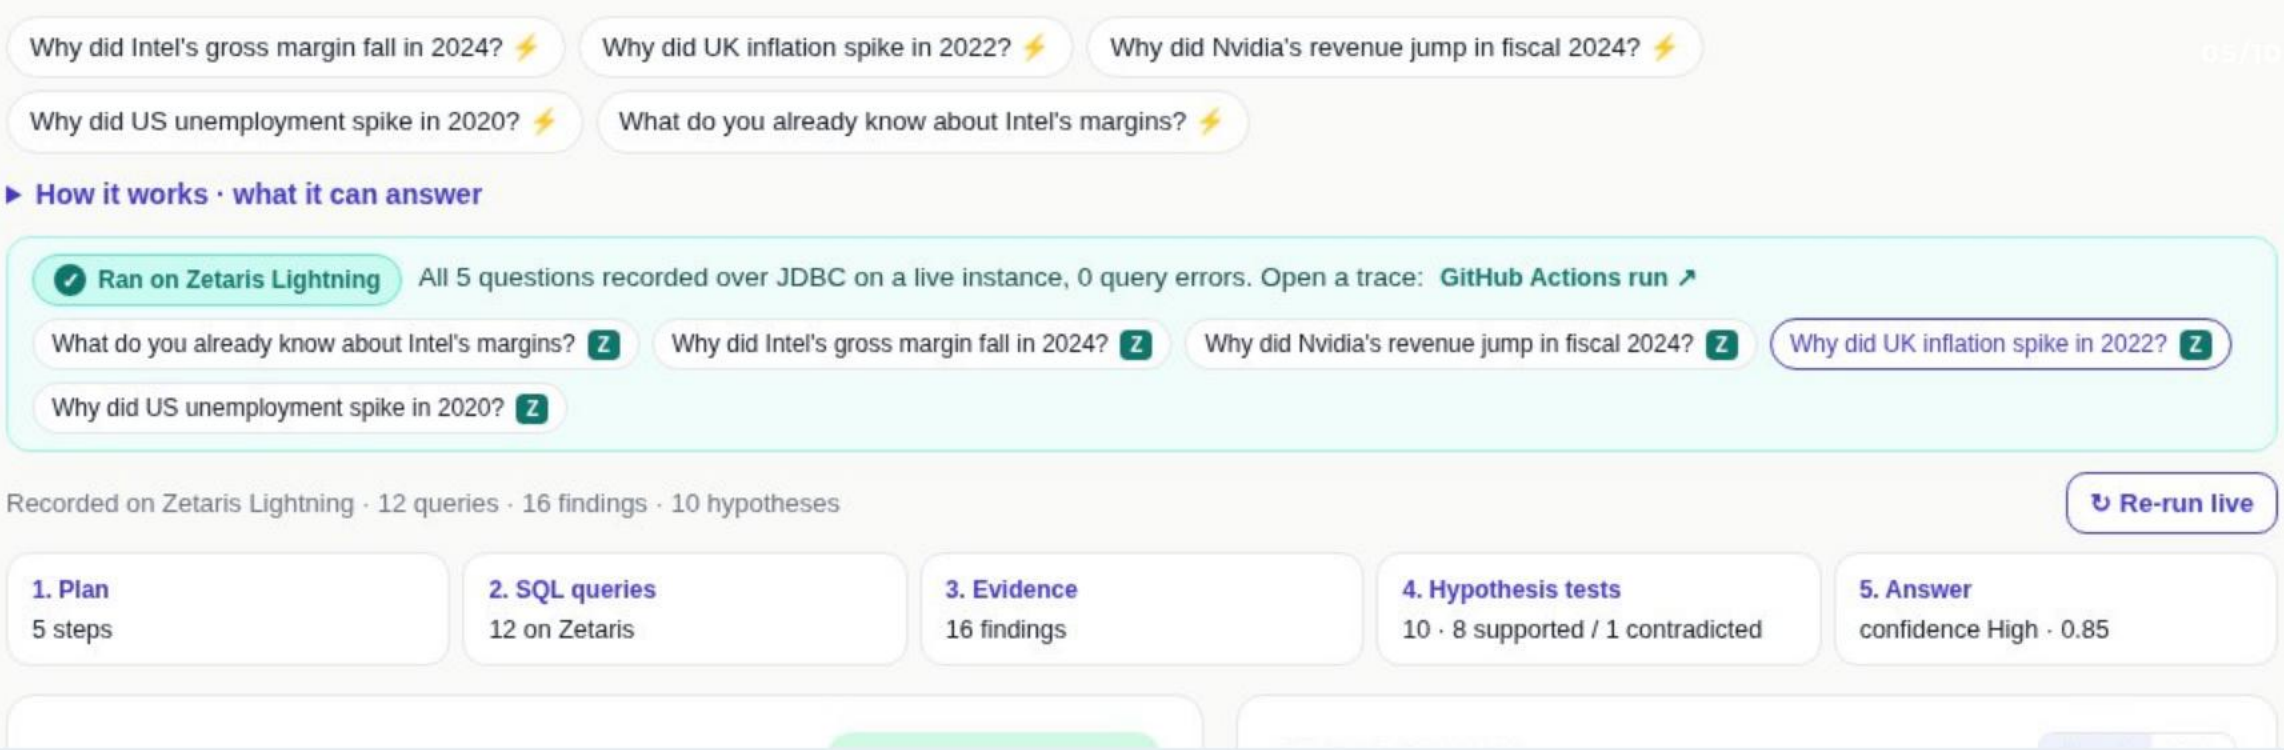

A 5 pm deadline

Her draft blames weak demand for Intel's margin fall. She asks Because instead.

One investigation

Scout guards and signs a contract. Zetaris SQL pulls evidence. Each hypothesis gets a numeric test. H-MEM remembers with provenance.

A real Lightning 2.4.3.1 instance on a GitHub runner answers every example question over JDBC.

Federated

EDGAR x FRED and ONS x FRED in one SQL JOIN

USL

Semantic layer model compiled, 9/9 statements

Gas leads UK inflation

One Lightning JOIN of ONS CPI and FRED European gas prices. Correlation by lead time, 2015-2022, 96 months.

Evaluation

19/19	16/19	0.71	109
Direction right, traps caught 2/2	Reference driver found	Confidence when right (0.52 when wrong)	Offline tests pass

Where it fails

Tesla margin 2023

Real cause was price cuts. No price data in filings. Answered Low 0.34.

Apple revenue FY2023

Real cause was Mac, iPad and a strong dollar. No segment or FX data. Medium 0.66.

Intel revenue 2023

Real cause was weak PC and server demand. Only pricing pressure was supported.

Sponsor stack

SPONSOR	WHAT IT DOES	STATUS
Zetaris	Federated SQL harness, USL model	Green CI run, 5/5
Meterless	Scout contracts, H-MEM provenance	H-MEM 13/13, Scout PASS
NVIDIA NIM	Validated narrative, Nemotron 3.5	Real runs; guard rejected invented numbers
Cursor	Rules and agent sessions	3 logged sessions; latest fixes without it

Read the trace

Every claim links to a query and a source row.
